

SALINITY METERS

SAL-1700

Suitable for measuring the salinity in aquariums/ fishery. The salt level is measured in three selectable units (PSU, S.G., and ppt). Each unit has an automatic temperature compensation (ATC) to provide accurate measurements.

TS-1

TS-1 is a very convenient salinity meter that automatically turns on by immersing the meter in a solution. With ATC function, The TS-1 is always accurate even at high or low temperatures. The meter sends a vibration alert to notify the user that the measurement is complete.
